

PERMANENT TACKY MAT

D-Step™ Mats remove up to 98+% of contaminants from the bottoms of shoes and wheels.

Made from a high tack polymer, mats remove contaminants through surface adhesion. Mats are ESD dissipative with a bacteria resistant surface.

Economical with no layers to peel and throw away, tack is regenerated by regular cleaning. Simply wet with D-Lead® All Purpose or D-Lead® Surface Cleaner, scrub and squeegee dry.

Low profile for easy passage of personnel and carts. D-Step™ Mats can be placed at the entrances to offices, locker rooms, vending areas and clean rooms to prevent shoe and wheel borne contaminants from entering clean areas.

Easy to install, D-Step™ Mats are able to stand heavy foot, cart and forklift traffic for years of contamination control. More cost effective than disposable tacky mats, D-Step™ Mats have a typical cost recovery of 3 to 4 months compared to disposable tack mats.

In addition to the standard 28" x 60" (71 cm x 152 cm) size, mats can be custom made in sizes up to 48" x 50' (1.2 m x 15.25 m) For larger sizes please call 877-532-5323 for assistance.

Thickness 90 – 100 mils
 Load Resistance 1200 psi
 Heat Resistance 32° F to 123° F; 0°C to 50°C
 Static Dissipative: 10⁸ Surface Resistance

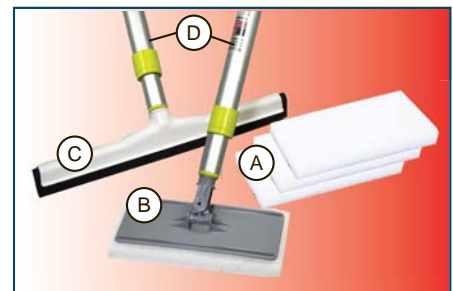

D-Step™ Mats

ITEM NO.	DESCRIPTION
FM100-2860	D-Step™ Mat Blue 28" x 60"
